

# COMPLIANCE REPORT: CJIS v5.9.3

## Summary

|                          |    |
|--------------------------|----|
| Controls Passed          | 00 |
| Controls Needs Attention | 02 |
| Missed Check-Ins         | 01 |

## SI-System and Information Integrity

### SI-2 Flaw Remediation

#### Status: Needs Attention

58 Vulnerable Assets

12 Missed Check-Ins

#### Requirement:

The organization:

- a. Identifies, reports, and corrects information system flaws;
- b. Tests software and firmware updates related to flaw remediation for effectiveness and potential side effects before installation;
- c. Installs security-relevant software and firmware updates within [Assignment: organization-defined time period] of the release of the updates; and
- d. Incorporates flaw remediation into the organizational configuration management process.

#### Outdated Assets (16):

|                                 |                                 |                                 |                                 |

## SI-4 Information System Monitoring

### Status: Missed Check-in

70 Missed Check-Ins

### Requirement:

The organization:

- e. Monitors the information system to detect:
  1. Attacks and indicators of potential attacks in accordance with [Assignment: organization-defined monitoring objectives]; and
  2. Unauthorized local, network, and remote connections;
- b. Identifies unauthorized use of the information system through [Assignment: organization-defined techniques and methods];
- c. Deploys monitoring devices:
  1. Strategically within the information system to collect organization-determined essential information; and
  2. At ad hoc locations within the system to track specific types of transactions of interest to the

organization;

- d. Protects information obtained from intrusion-monitoring tools from unauthorized access, modification, and deletion;
- e. Heightens the level of information system monitoring activity whenever there is an indication of increased risk to organizational operations and assets, individuals, other organizations, or the Nation based on law enforcement information, intelligence information, or other credible sources of information;
- f. Obtains legal opinion with regard to information system monitoring activities in accordance with applicable federal laws, Executive Orders, directives, policies, or regulations; and
- g. Provides [Assignment: organization-defined information system monitoring information] to [Assignment: organization-defined personnel or roles] [Selection (one or more): as needed; [Assignment: organization-defined frequency]].

## SI-7 Software, Firmware, and Information Integrity

#### Status: Need Attention

70 Integrity Failures

#### Requirement:

- a. Employ integrity verification tools to detect unauthorized changes to the following software, firmware, and information: [Assignment: organization-defined software, firmware, and information]; and
- b. Take the following actions when unauthorized changes to the software, firmware, and information are detected: [Assignment: organization-defined actions].

## Appendix: Vulnerabilities

### Flash Descriptor Unlocked

**Severity:** Critical - 9.5

#### Overview:

Flash Descriptor write-protection protects settings on the Flash from being maliciously or unintentionally changed after manufacturing is completed.

#### Description:

If the equipment manufacturer doesn't enable Intel-recommended Flash Descriptor write protections, a privileged, local attacker can modify the contents of the Flash Descriptor region. This allows an attacker to change access permissions for other regions or change layout for any regions which may be used to bypass hardware protections like PR registers and BIOS Control Register.

#### Recommendation:

Potential Firmware Update: Fixes are available for certain platforms from certain vendors. Check latest firmware in vendor web-site and install the latest updates.
